

TOGETHER We can save more

Reduce your energy use. Manage your energy costs. Promote a sustainable community.

A Powerful Partnership

San Luis Obispo County Energy Watch

Energy issues have a profound effect on ecosystems, global climate, commerce, the provision of public services, land use planning and development, transportation, and quality of life. Using energy more efficiently will benefit residents and businesses economically and reduce environmental impacts.

San Luis Obispo County General Plan, 2010

The County of San Luis Obispo, Pacific Gas and Electric Company, Southern California Gas Company and participating municipalities have partnered to reduce energy use, better manage energy costs and promote sustainable communities.

For over a quarter of a century, utilities have provided programs and services designed to save energy and reduce costs. Similarly, local communities are developing energy plans and policies that position them to thrive in the future.

San Luis Obispo County Energy Watch provides a convenient link between the community and utilities to help you make the best use of available expertise. Through the San Luis Obispo County

BETTER TOGETHER

We can save more

Energy Watch Partnership, individuals, businesses and communities find assistance in taking charge of their energy use.

Involvement in San Luis Obispo County Energy Watch offers the County's towns and cities a host of benefits:

Better Buildings

- Energy assessments of municipal facilities
- Technical assistance for improving and benchmarking energy efficiency
- Assistance with energy efficiency retrofitting of existing municipal facilities
- Energy efficiency training and education for facilities managers and operations staff
- Assistance identifying financing opportunities and incentives

Better Future

- Energy-efficient design assistance for new buildings
- Support for enhancement and enforcement of energy codes
- Expertise for developing an energy policy that promotes sustainability
- Support for green jobs development

Industry Professionals

Designers, architects, HVAC technicians, refrigeration technicians are just some of the examples of the building professionals who are essential to building more energy-efficient communities. The Partnership will make available energy efficient utility and local programs and webinars for training and education on energy efficiency standards, techniques and technologies.

Small- and Medium-Sized Businesses

The utilities help businesses realize immediate and long-term energy savings through the installation of energy-saving lighting and other measures. During an initial visit, an Energy Specialist performs a facility assessment to identify ways to save energy.

The Partnership can also assist businesses in utilizing utility programs, such as commercial rebates, incentives and financing programs, as well as demand-side management programs that reduce energy use during peak hours.

Community

By providing leadership in energy efficiency, local government partners will help local residents learn more about saving energy and managing energy costs at home. Partners can assist local residents in learning more about saving energy and managing their energy costs, as well as accessing utility programs such as energy efficiency rebates and incentives.
